

MARKET-SPACE WITH A VOICE RECOGNITION TECHNOLOGY FOR AN EFFICIENT TRACKING OF AGRICULTURE/FOOD PRODUCTION PROCESSES

Branimir POPOV Founder & CEO

Current situation

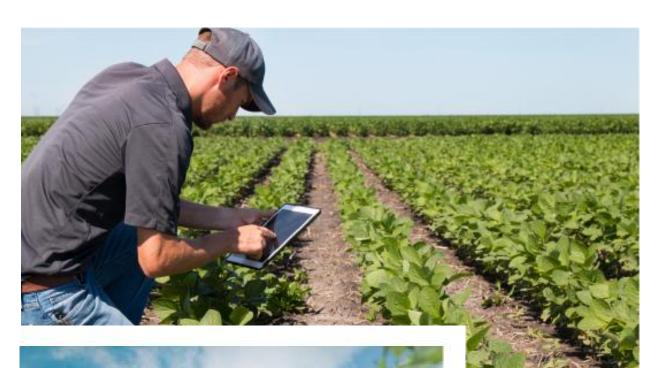

There are 800 millions of farmers around the world where 60% aren't capably to write, read or identify the processes in the fields during the production cycle.

There are more than 500,000 agriculture and food companies around the world with more than 20 millions of employees who are seeking for a ways to improve their efficiency and productivity every day.

Problem

Farmers spent 25% of their time on searching and informing about the products they need to apply at the fields in particular situation.

Agribusiness and food companies spent more than 900 minutes monthly per professional employee for writing reports.

That is costly and kills productivity for 25%

Field **crop insurance**professionals spent **33%** in writing reports about the field conditions.

Solution

Web/Android/iOS app

Aggregator and **market-space** for a new era of cloud communication

Speech to search technology for fast product search

Voice recognition and transcription technology with georeferenced position for agribusiness and farming industry
